OVERVIEW

Technix India was started with the aim of helping customers and business to save their rising IT cost without impacting the quality. Established in 2004 as Headquarter and Global Delivery Center in Patna, India. We deliver end-to-end solutions through valuable strategy development, consulting services, and highly skilled engineering execution. We are known for our Quality, Delivery in Time and Systematic Post-Sales Maintenance Services.

OUR MISSION

Our mission is to provide customer a specialized, reliable, high-quality sophisticated services with cost saving. Our Customer must experience that working with Technix India is a more professional, less risky way to develop and implement project than working completely in-house.

CORE VALUE

Our aspiration is to recognize your business, share a common business goal with you, and help you reach your objectives. We value the relationship we create with our customers and ultimately become an extension of their businesses.

BusinessBook: Accounting & Inventory Software

BusinessBookPlus: Accounting & Inventory software that automates general transaction for a business and significantly improves business operations, profitability and saves time for managing complex account books. It is designed on concept that it can be handle itself by a business owner and all the key business information will be accessible and available anytime without a dependency on others. This facilitates the business owner to make the right decision in a timely manner.

T-CAMS: Cooperative Account Management Software

T-CAMS is a software solution for the Cooperative society, Shahkaari Samitee, Cooperative Bank, Nidhi Companies, Micro- Financing organization dealing in Member Registration, Share Allotment, Account opening, Thrift Fund, Deposit, Loans, Fixed-Deposit, Recurring Deposit etc. T-CAMS manages every transaction of the members and simplifies interest calculations, loan processing and account management.

e-CAF: Customer Acquisition Form Management

Technix-eCAF offer Customer Acquisition Form management services to ensure that the entire flow is controlled to ensure timely movement of CAFs. The services provide efficient and effective means to make the data available in optimum time, minimizing delays and improving the value of service. This software provide end-to-end CAF management services, from Pickup Tracking, Audit, Data entry Scanning, Indexing CAF Warehousing, CAF Retrievals.

FOM: Forest offence Monitor

Forest Offence Monitor- [FOM]: Forest offence Monitoring system is a software that automates most of the Court Section process of Territorial Division of Forest Department. User can maintain records related to the offence, prosecution, compounding and confiscation including Act of offence, Section of offence, Offence Site, Materials Seized and Offenders details. The product was developed under the guidance of senior forest officer- DFO, Conservator and RCCF.

HR Payroll & Roster

Scheduling the Right people at Right place at Right time is now easy. Online Pattern based Employee Scheduling & Workforce management, human resource deployable, time & attendance, leave and overtime history, holiday list, Schedule vs. Labor demand reporting that forecast, manages and analyzes cost. Suitable for medium and large organization.

CRM

Customer relationship management (CRM) refers to the principles, practices and guidelines that an organization follows when interacting with its customers. This entire relationship encompasses direct interactions with customers, such as sales and service-related processes, and forecasting and analysis of customer trends and behaviors.

SchoolM- School Management Software

SchoolM is a management information system for the educational establishment to manage student data. Technix-SchoolM provides capabilities for admitting or registering and enrolling students, Student Categorization, Special Students, Fee Collection, Tracking Attendance, Test-cum-Examination and result generation, Documenting & Grading, Monitoring Information on student performance, Transportation, Hostel, Library, General Expenses, Inventory and Accounting, with Employees Payroll.

ShoppingList- Mobile Apps

Shopping List is an app for Mobiles, a handy tool that helps you make a shopping list and track what is shopped and what is left out in a very simple way. When you want to go for shopping, browse through the Item List and select all the items you want to shop and those items will start appearing on your "Shopping List". This is a fantastic and easy to use tool that everyone needs, specially for the Business Goods and Grocery Shopping.

TECHNOLOGY PORTFOLIO

AWS

Amazon Web Services (AWS) is a secure cloud services platform, offering compute power, database storage, content delivery and other functionality to help businesses scale and grow. Explore how mil-lions of customers are currently leveraging AWS cloud products and solutions to build sophisticated applications with increased flexibility, scalability and reliability.

JAVA/J2EE APPLICATION DEVELOPMENT

When it comes to server side enterprise systems and enterprise applications, we use our expertise in JAVA/J2EE to provide our clients with custom lifecycle applications and products. Essentially, JAVA is used for server side enterprise systems and J2EE (JAVA 2 Platform, Enterprise Edition) is used for designing, development, assembly and finally deployment of the enterprise application by using a component based approach.

PHP & LAMP BASED DEVELOPMENT

LAMP is an open source Web development platform that uses Linux as the operating system, Apache as the Web server, MySQL as the relational database management system and PHP as the object-oriented scripting language. PHP is a free server-side scripting language that has been designed for not just web development but also as a general-purpose programming platform. MySQL is the world's most popular open source database. With its proven performance, reliability, and ease-of-use, MySQL has become the leading database choice for web-based applications.

ANDROID

The Android operating system is a mobile operating system developed by Google primarily for touchscreen devices, cell phones, and tablets. Its design allows users to manipulate mobile devices intuitively, with phone interactions that mirror common motions, such as pinching, swiping, and tapping.
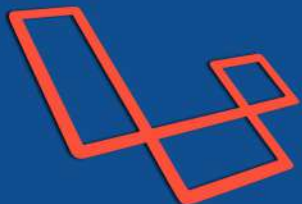

GitHUB

GitHub is a web-based hosting service for version control using Git. It is mostly used for computer code. It offers all of the distributed version control and source code management (SCM) functionality of Git as well as adding its own features. It provides access control and several collaboration features such as bug tracking, feature requests, task management, and wikis for every project.

LARAVEL DEVELOPMENT

Laravel is a PHP web application framework with expressive, elegant syntax, aiming to easy common tasks, such as authentication, routing, sessions and caching. It provides, accessible, powerful tools needed to build, large robust applications, with an inversion control container, expressive migration system, and tightly integrated unit testing support. Laravel is perfectly suited to all types and sizes of projects.and it works great on MySQL, Postgres, SQL Server, and SQLite.

Customer Reviews

Tricia Rose

Exactly what I was looking for. I like to keep the cost of each item stored so I can check and compare. This app let's me do that as well as add the place of purchase at said price. The weight or size and whatever other info I would like to add all this info then shows up on my list when I shop. Thanks, I am more than happy with "Shopping List " App.

Burr Patch

Nice little app. Goodbye stripp's of paper, matchbook covers, napkins and the palm of my hand for shopping lists. No bells, no whistles. No giving permissions to the Data Vampires. It does what it says and says what it does. Halalujah!!!!!!!

Sarah Graely

Fantastic app which means I never forget the shopping list. I have memory problems and love the master list as it often prompts me to check something else before I go for shopping, and I can add things to the list when I realise I need them.

A Google user

Great App. Put all the items that I buy and even put the stores I buy them at on the list. I expand the list as I go and nothing ever disappears or gets deleted. Love it. Been usi ng it for some time now, haven't anything better, very satisfied.

Tasia Rittenberry

Works pretty well so far. I like that you can type several things and then it will list them.

A Google user

So much easier and more convenient than a paper list I could never go back to the old way. Even my few year old great grand daugher learned to use it in just a few minutes and lives to mark off the items as we buy them. She can even add items to the list .

Rachel Van de Ruit

Love the simple, straightforward way this app runs. There's no hassle and, best of all, there's no annoying ads. Its definitely the best app to use when shopping!

Customer Reviews

Cornelia Jones

My shopping list is a life saver, when I get to the grocery store I don't have to think about what is needed for the house are Wonder if I forgot something, or over spend I just look at my list and go for it.

Patricia Burnette

So cool thanks much. Awesome easy to use app. You can add your own needs to the master list, it's so cool.

Kirk Fonseca

Nice simple app. It lets you create a master list. Then you can select items you want to buy from that list. When you are done, you can erase what you ordered & your master list still stays the same.

Peter Rafferty

The Best!!!! At last an app that works almost the way I want it. It's great being able to create a shopping list from the master list in a couple of minutes and not to have to rely on an aged memory.

Brooke Benning

It is simple and so easy to use. Just type in all the things you need daily, weekly or monthly, things you use all the time or rarely and then you can just pick and chose what you need for your shopping trip. Love it!

Mamata Pansuria

Love it I always forget something when I go for groccery shopping but thanks to this app.. I never miss anything now. I would definately recommend this one, specially if u r working and have limited time in hand for shopping

Mimi Namalala

Very useful Great app. I would like to see price of items included in the future but other than that it works grest for me. Love the master list and shopping list. And you can convert to an excel doc. Very convenient.
